Computer Science

Projects

OClass

https://oclass.app

Currently, I am working on an Angular/Ionic project that encompasses a corporate site, client site, Android and iOS apps. Additionally, I am involved in developing custom iframes using Stencil.js. I utilize various frontend technologies such as EJS Grids, Graph.js, and Omise gateway for payments. I am continuously learning and expanding my skills in this dynamic field.

LSWeb (Inventory management system)

http://Not published yet

LS web is an inventory management system which is being developed on Angular, tailwindcss and primeng UI library. It is a long term project and currently im working on this app.

Teckgenii

http://www.teckgenii.com
